

Subject of the article: the formation of economic and legal consciousness. *Object of the article:* the formation of the economic and legal consciousness of medical students. *Purpose of the project:* development of a theoretical model of the formation of economic and legal consciousness of students of a medical university. *Methodology of work:* the hermeneutic approach humanizes the process of formation of economic and legal consciousness, excludes the objectivity of scientific knowledge, activates mental activity, teaches to transform the strategy of professional activity in accordance with new economic trends. The anthropological approach contributes to the formation of initiative, erudition and tolerance. *Results of the work:* a theoretical model of the formation of the economic and legal consciousness of students of a medical university was developed. *Scope of the results:* the developed model is universal in nature and can be used in educational processes of universities of different directions. *Conclusion:* the formation of economic and legal consciousness will eliminate the problem of the shortage of medical personnel in rural areas.

Key words: legal and economic information, economic and legal consciousness, additional educational program, hermeneutic approach, anthropological approach, cognitive-behavioral therapy, interactive methods, concentric and problem presentation of material, interaction with employers.
